Exhibit shown or demonstration conducted: d) Yes	e) 🗵 No. If yes, brief description:						
Identification of prior art discussed:							
Freedman and Josephy							
Agreement with respect to the claims f) was reached. g) was not reached. h) N/A. Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or							
any other comments:							
Applicant discussed the 35 USC 112, second paragraph rejection and proposed to submit a declaration, with evidence, that the basis is "by weight". With regard to Freedman reference, applicant argued that biaxial orientation is not desired							
as per the background section, It was pointed out that "not desried" does not mean biaxial orientation cannot be formed.							
In fact, the extrusion process of Freedman would inherently provide for the monoaxial orientation. Further, regardless of Josephy's utility, it clearly teaches that mono- or bi-axial orientation can be conducted to the label product. Applicant also							
proposed to direct the examiner's attention to specific exam	nples in the instant specification.						
(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)							
i) 🛮 It is not necessary for applicant to provide a separ	ate record of the substance of the interview (if box is checked).						
Unless the paragraph above has been checked, THE FORMAL WRITTEN REPLY TO THE LAST OFFICE ACTION MUST INCLUDE THE SUBSTANCE OF THE INTERVIEW. (See MPEP section 713.04). If a reply to the last Office action has already been filed, APPLICANT IS GIVEN ONE MONTH FROM THIS INTERVIEW DATE TO FILE A STATEMENT OF THE SUBSTANCE OF THE INTERVIEW.
